

Project update, July 2020

[Online version](#)

I can't sleep; I am scared and feel depressed.

These are Basma's words, a teacher from Yemen, who got in touch with us through one of our Facebook pages. Every day our Follow Up team talks to numerous people in the Arab World who struggle with the psychological, spiritual and economic consequences of the corona crisis.

Our team listens, empathises, prays, offers advice and when possible practical help. Where appropriate, we can offer psychological help and we always offer hope and direction from the Word of God.

Amal, a Muslima from Algeria, expressed the hope, *'that God will take away the fear from our lives.'* But she added something to that hope, *'I trust in the prayers of our Christian brothers and sisters.'*

Please pray for her and the many others who are going through difficult times and [help us](#) to produce content for social media and provide follow up. Read about [project Hope](#).

- Would you love to watch the first four episodes of the series about the church in North Africa - in English?
- Would you like to know which social programs we have produced over the years?
- How are the refugee women doing we have filmed for the *Maaki* series?
- Is it risky to have a haircut when pregnant?
